

Hyprrland Cheat Sheet

Mod key = SUPER (Windows key). Bindings from DMS defaults + user additions in `~/.config/hypr/hyprland.conf`.

Launch / Quit

Keys	Action
SUPER + Return	Open terminal (kitty)
SUPER + T	Open terminal (kitty — DMS default)
SUPER + Space	DMS spotlight launcher
SUPER + D	Fuzzel launcher (fallback)
SUPER + E	File manager (<code>kitty -e yazi</code>)
SUPER + Q	Close focused window
SUPER + SHIFT + E	Exit Hyprrland
SUPER + X	Power menu (DMS)
SUPER + ALT + L	Lock screen (DMS)

Window Control

Keys	Action
SUPER + F	Maximize window
SUPER + SHIFT + F	True fullscreen
SUPER + SHIFT + T	Toggle floating
SUPER + R	Toggle split direction
SUPER + drag (left btn)	Move floating window
SUPER + drag (right btn)	Resize window
SUPER + SHIFT + P	Toggle monitor DPMS (display power)

Focus and Movement

Keys	Action
SUPER + H / J / K / L	Focus left / down / up / right
SUPER + ← / → / ↑ / ↓	Focus (arrow key variant)
SUPER + SHIFT + H/J/K/L	Move window in that direction
SUPER + SHIFT + ←/→/↑/↓	Move window (arrow key variant)
SUPER + CTRL + H/J/K/L	Focus monitor in that direction

Keys	Action
SUPER + SHIFT + CTRL + H/J/K/L	Move window to that monitor

Workspaces

Keys	Action

SUPER + SHIFT + S	Send window to scratchpad

Screenshots

Saved to `~/Pictures/Screenshots/`.

Keys	Action
Print	Whole output
CTRL + Print	Region select
ALT + Print	Active window

DMS Panels / Widgets

Keys	Action
SUPER + V	Clipboard history panel
SUPER + M	Process list
SUPER + ,	Settings
SUPER + N	Notepad
SUPER + Y	Wallpaper picker
SUPER + SHIFT + /	Keybind cheat sheet (built-in DMS overlay)

Media / Brightness

All XF86 laptop keys work — volume, mute, mic mute, brightness up/down, play/pause/next/prev — routed through DMS IPC. No extra config needed.

Clipboard History (Manual)

```
cliphist list | fuzzel -d | cliphist decode | wl-copy
```

Recovery

Situation	Action
Stuck session	<code>Ctrl+Alt+F3</code> → TTY → <code>loginctl terminate-user \$USER</code>
View logs	<code>~/.cache/hyprland/hyprland.log</code> · <code>journalctl --user -b</code>
Fallback session	GDM gear icon → pick GNOME or Sway
Reload config	<code>hyprctl reload</code>
Inspect state	<code>hyprctl clients</code> · <code>hyprctl monitors</code> · <code>hyprctl workspaces</code>

DMS

- Config: `~/.config/hypr/dms/` — binds, colors, layout, cursor, outputs, windowrules
- `dms setup` — re-run to regenerate baseline config
- `dms run` — start the shell (already in autostart)
- Bar right-click → quick settings, theme, widgets

Cheatsheet Upkeep

Edit this file whenever you change a binding. Commit alongside the config change.
